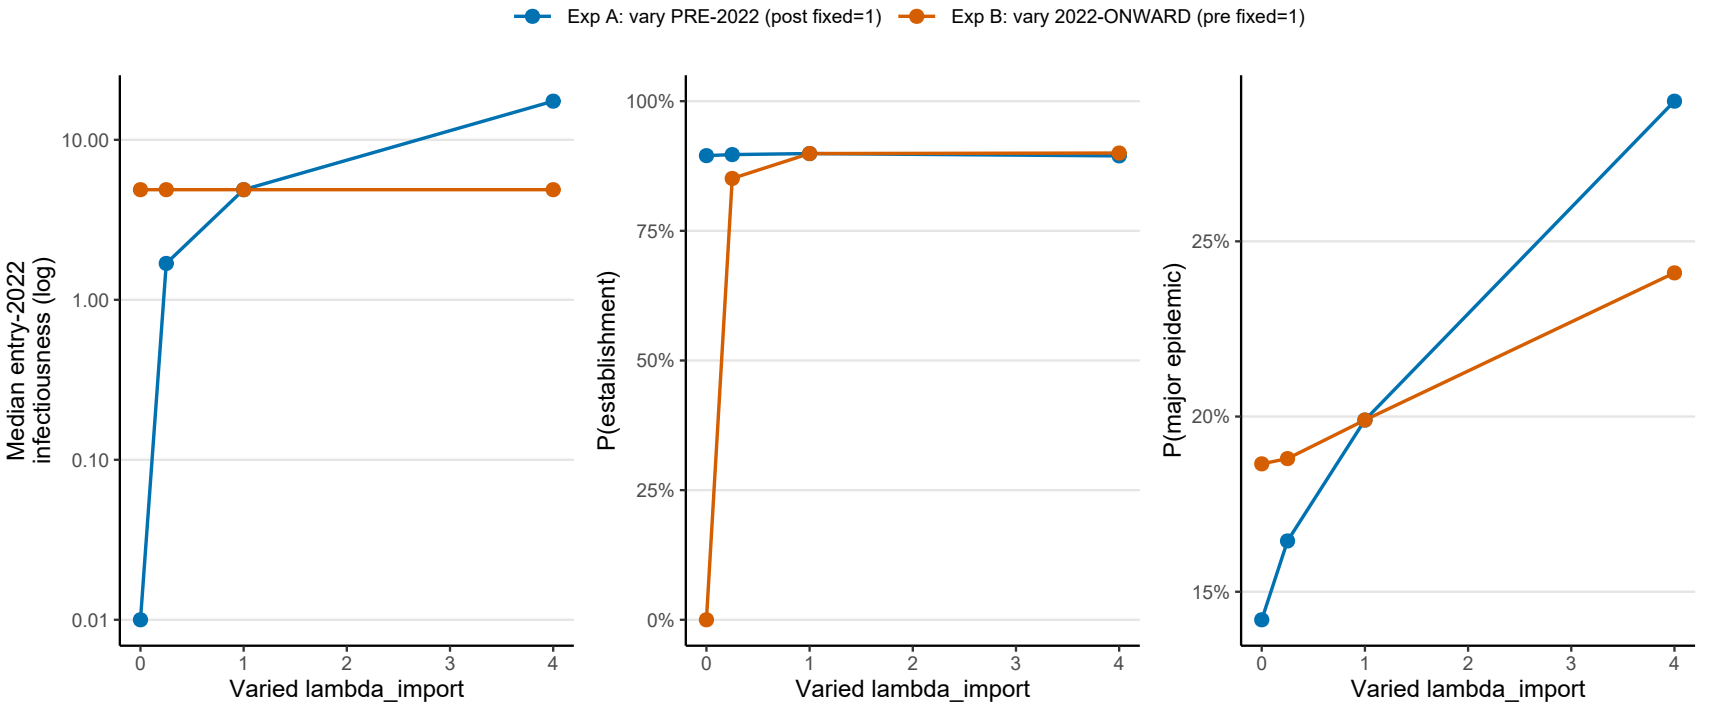

FIG25. Pre-2022 vs. 2022-onward importation: which matters more for the 2022 outcome? (H1/G2)

Pre-2022 pressure (blue) moves P(major epidemic) ~2.7x more than equal-sized changes to 2022-onward pressure (orange).

PROVISIONAL: H1/H2 training-only posteriors have low but nonzero HMC divergences and incomplete within-chain mixing (tau_year upper tail); all results below are conditional on this. Sensitivity ARMS (diagnostic, prespecified lambda grid), not calibrated model selection -- no lambda is chosen as a new reference.
